P A P E R I S O U R P A S S I O N

## Creative Project Ideas

### Candy Bar Wedding Favor

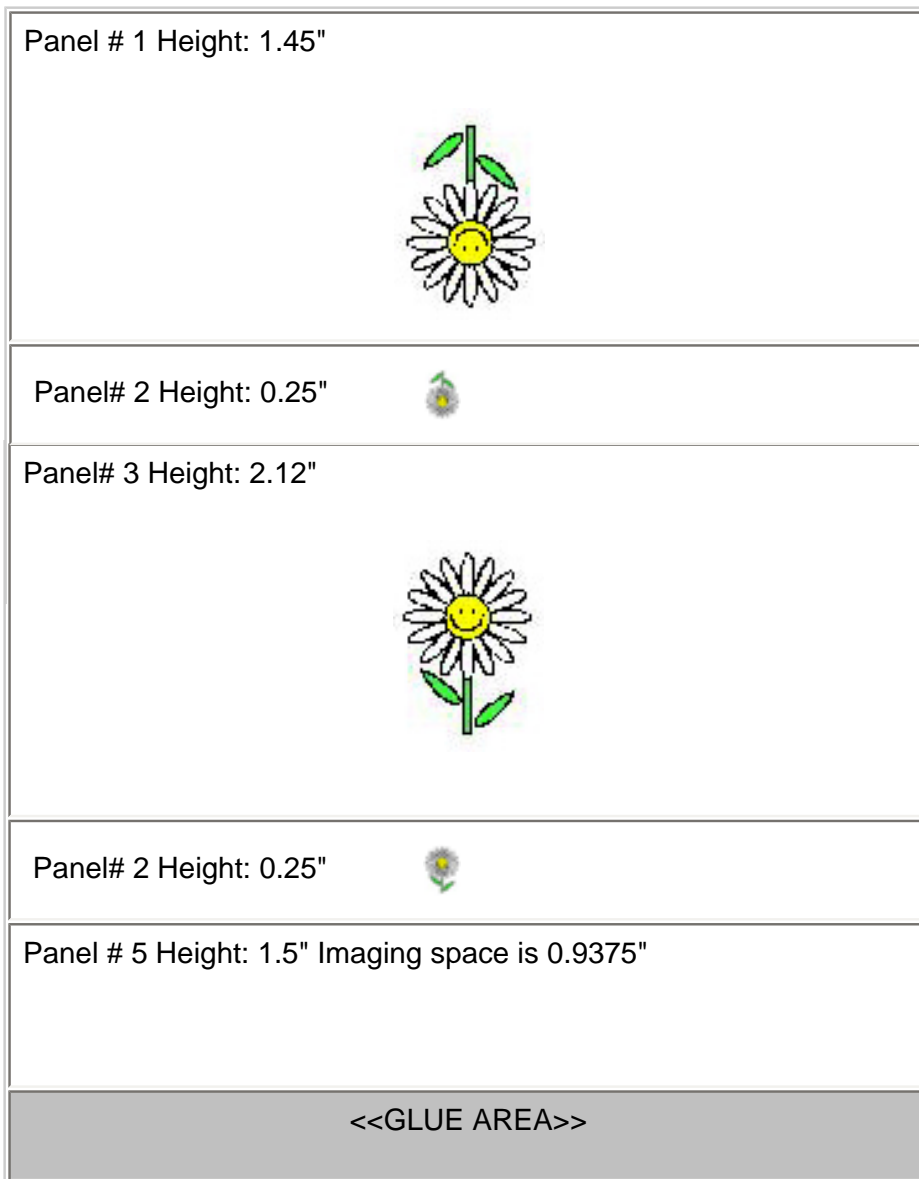

#### You will need:

- 1 Sheet PrintWorks Photo Paper Satin
- 1 Candy bar (Hershey's, Nestle Crunch) (Standard Size, **Not** King Size)
- Desktop publishing or Word processing Software
- Glue or 2-sided tape

Open a new document. The candy bar wrapper has five panels that can be designed. You can design the front, back and both sides of your candy bar wrapper. By following these instructions, you can be sure that your images will fit inside each panel. See the template layout below.

**If you are using Microsoft Word or another Microsoft program you can use textboxes to format your wrapper, or create a table with the exact measurements of each panel. To customize the size of the textbox, after you have created the textbox, right click and there appears a menu. Choose the option that says, "Format textbox". There is a tab for "Size". Fill in the height and width as stated in these instructions.**

Insert photos and images from clip art or photos of your own. Add text, clipart, names and special dates to personalize.

### To Create the Panels

- Panel # 1: When wrapped around the candy bar it is the back of the bar. The panel measures 1.45" high by 5.25" wide. The image that is placed on this side should be inverted (See flower orientation).
- Panel # 2: This is the small side panel measuring 0.25" high by 5.25" wide. You can choose to write a message or follow our example where we just put the bride and grooms names. This image should also be inverted.
- Panel # 3: This is the front side of the candy wrapper. The front measures 2.12" high by 5.25" wide. We used the actual wedding photo in conjunction with clip art and textboxes.
- Panel # 4: This is another side where we have the image that was on Panel # 2. This side **does not** get inverted. This panel measures 0.25" high by 5.25" wide.
- Panel # 5: This is the backside measuring 1.5" high by 5.25" wide. You may choose to do as we did and insert a clip art image. Note bottom inch is the glue area so don't create a design in this area.

## Printing Your Craft

- 1: Print a test print on a plain piece of paper and cut it out to check the fit around the candy bar.
- 2: Once you are satisfied with the overall wrap you can print it to the Photo Paper Satin according to the appropriate printer settings. Check printer settings on page 4.
- 3: Trim your wrapper and wrap up your candy bar. Seal it with double sided sticky tape\*. Enjoy!

\*You can also use our 00535 Holographic Multi purpose labels or you can purchase our 00536 Mailing seals in Office Depot.

Personalized Candy bars can be used for any occasion, the announcement of a new baby, as birthday favors, as a thank you, etc. Or, as we have done - use them as Wedding favors.

# Photo Satin Printer Settings

*Printer Settings* – Printworks Photo Paper is compatible with most color inkjet printers. Select printer settings from the chart below:

Canon	Printer Model	Paper Type	Print Quality	Advanced (Customize) (Other)
	i500 & i800 SERIES	Plain Paper	High	Scale set at 1; Manual- Enable ICM, Image Optimizer - Checked, Photo Optimizer - Checked, Apply Throughout Page - Checked
	S200, S300, S400, S500, S600, S800 SERIES	Plain Paper	Standard	Scale set at 1; Manual- Enable ICM, Image Optimizer - Checked, Photo Optimizer - Checked, Apply Throughout Page - Checked
	i900 SERIES	Glossy Photo Paper	High	Scale set at 1
